Let's Juice.

Quick Start Guide

Vitality 5800
Cold Press Juicer

Welcome to the family!

The Nama team and I would like to thank you for purchasing our Cold Press Juicer. We understand that a Nama juicer is a significant investment in you and your family's health and we are grateful that you have chosen to join our community.

I launched Nama as a way to help and inspire others by providing our community with solutions to add more real foods derived from plants, including fruit, vegetables, nuts and whole grains, into our daily food rituals. Making cold press juice is a great way of extracting Mother Nature's goodness from fruits and vegetables and hydrating our bodies with this nutrient dense liquid sunshine.

I hope that you enjoy your purchase and that juicing can become a ritual that you embrace and share with those around you. If the Nama team or I can assist you in any way, please feel free to reach out anytime. We are here to support you along the journey of becoming better everyday.

With much love,
Dan Sheehan
Founder

P.S. Please feel free to email me directly with your feedback (good or bad) at dan@namawell.com or our customer support team at support@namawell.com

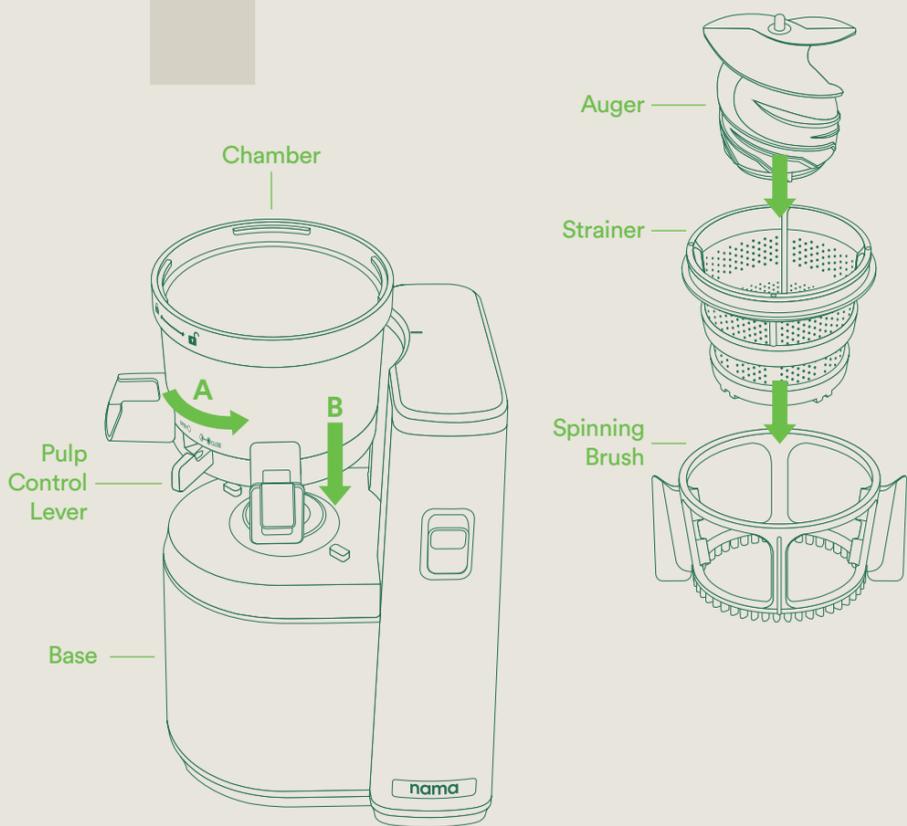

1

(A) Rotate the pulp control lever to the right ensuring it is in the **● CLOSE** position.

(B) Place chamber on the base.

Then, place the auger in the strainer,* then into the spinning brush.

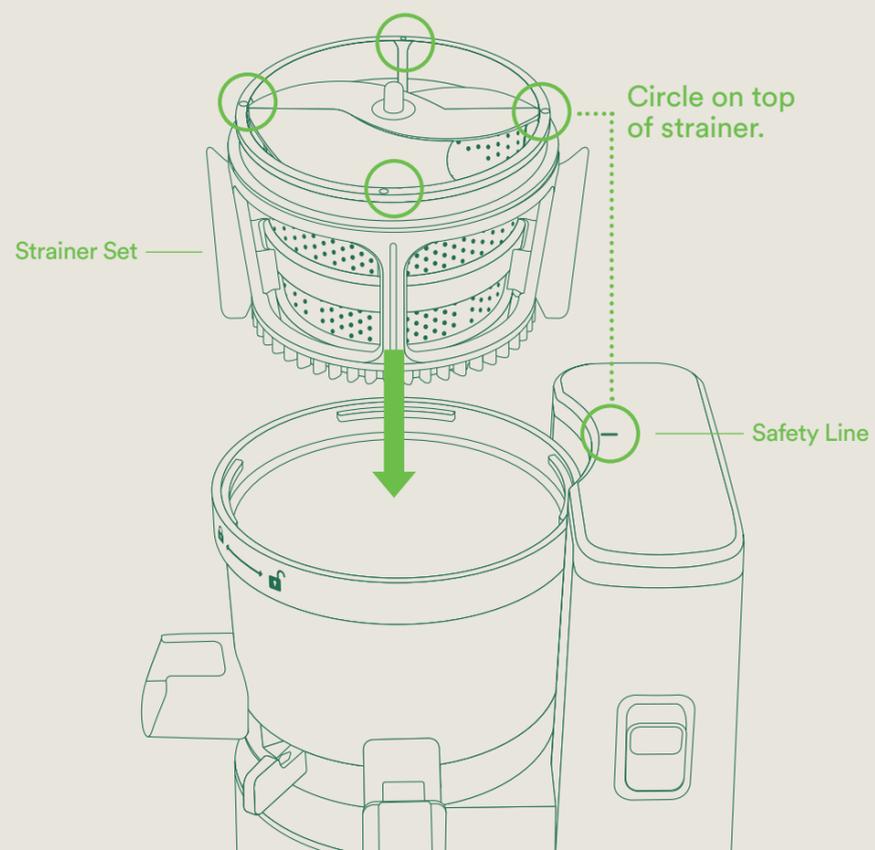

*See page 16 of the manual for more information on strainer variation.

2

Place strainer set in the chamber by aligning any circle on the strainer rim to the safety line on top of the base.

Wiggle strainer set until grooves on the bottom and auger fit perfectly into place.

Ensure the top of auger is flush with top of strainer set.

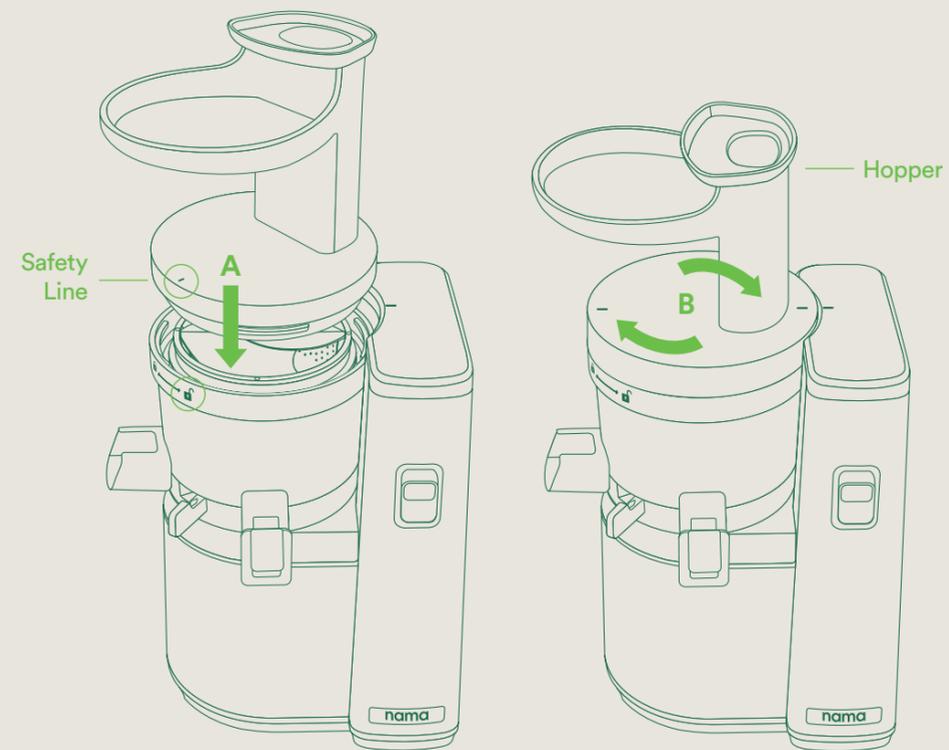

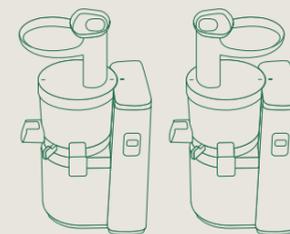

3

(A) Assemble the hopper with either safety line aligned with **☑** on chamber.

(B) Turn it clockwise until it is locked completely with safety line aligned with **☒**.

NOTE:

The hopper can be operated when assembled in either direction for easier operation by user.

4

GETTING STARTED JUICING:

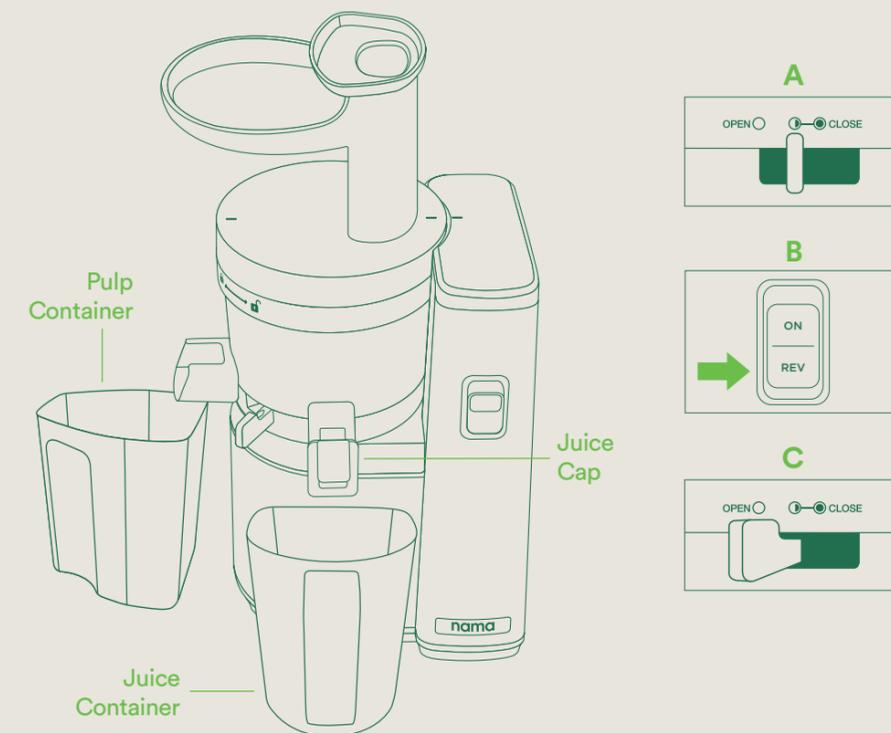

Close juice cap and place containers for juice and pulp collection.

(A) Rotate pulp control lever to half-open position when inserting the last ingredients.

AFTER JUICING TIPS:

(B) Press and hold **REV** for 5-10 seconds to loosen up the pulp and allow for easier disassembly. It is easier to open hopper while chamber is on base.

(C) When cleaning, rotate pulp control lever to **○ OPEN** position.

We're here to help.

Make sure to register your Nama Cold Press Juicer at namawell.com/registration for up to 10-year warranty.
